

# FREQUENCY BEHAVIOR CHART

Student Name \_\_\_\_\_

Date \_\_\_\_\_

The Frequency Behavior Chart may be used to implement an incentive program to reinforce behavior progress. First, determine a daily or weekly goal. Then, draw an "X" in a numbered box to indicate how many steps the student needs to move to earn a reward. For each appropriate behavior, place a sticker in the box. If the student reaches the predetermined goal (the box marked by the "X"), a reward is earned.
