

ONLINE ACTIVE SHOOTER TRAINING THAT SAVES LIVES

STEPS FOR SURVIVAL ONLINE TRAINING PROGRAM

For Transportation Professionals

The GOLD STANDARD in Active Shooter Preparedness Training.

From the moment the school bus doors open to welcome a student aboard in the morning to the time they are delivered to their destination, students are in the care of transportation professionals. These can be some of the most important and dangerous minutes in a student's day.

At ONE Training, we heard the call from transportation professionals who had been attending active shooter preparedness trainings geared towards classroom teachers for years. We designed our Steps for Survival for Transportation Professionals course for you. This program leads transportation professionals through a series of exercises and lessons that are created with the specific advantages and disadvantages of being on a bus in mind.

This life-changing class will not scare you or present you with gory images, but it will allow you to see your life-saving potential in a new way and embrace that newfound power.

This 2-hour class encourages and empowers transportation professionals to move forward from feelings of helplessness toward being prepared to handle a wide variety of potential threats.

Key Elements of the Course Include:

- A brief history of attacks on school buses.
- Studies and exercises on stress inoculation.
- Methods to be an effective decision-maker.
- Options available to you during an attack and how to use them.
- Adaptations of the federally recommended Run-Hide-Fight response.
- Situational awareness methods.
- Methods to counter an attack that anyone can use.
- How to spot trouble and react.
